

Salah Eldin Ahmed

Full-stack Web Developer

+20 1228075681 · salahlala303@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#) · Egypt

SUMMARY

Full-stack Web Developer specializing in Next.js, Node.js, TypeScript, and PostgreSQL. Experienced in building scalable web applications, designing REST APIs, implementing authentication systems, and developing production-ready products with modern architectures.

TECHNICAL SKILLS

- **Languages:**
 - JavaScript, TypeScript, HTML, CSS
- **Frontend:**
 - React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap
- **Back-end Development:**
 - Node.js, Express.js, REST APIs, GraphQL Fundamentals, JWT Authentication
- **Databases:**
 - MongoDB, PostgreSQL, Prisma ORM, Mongoose
- **Tools:**
 - Git, GitHub

PROJECTS:

Sakinah Streams - [Demo](#)

Quran Web Application | *Next.js, TypeScript, Prisma, PostgreSQL*

- Developed an intelligent Khatma Planner that generates personalized daily reading plans based on the user's target pages per day and automatically tracks reading progress.
- Implemented activity tracking with streaks, session analytics, and a personalized reading journey dashboard
- Integrated Morning/Evening Athkar, Quran radio, and multi-reciter audio playback with wishlist support
- Implemented an AI Reflection Companion that generates Quran-inspired reflections with authentic verse references and relevant Athkar while prioritizing safety and authenticity.
- Optimized application performance using SSR, SSG, and external APIs to deliver a fast, responsive user experience.

Learning Management System (LMS)

MERN Stack, Stripe, Cloudinary

- Built a complete learning platform with secure JWT authentication, role-based access, and persistent user sessions.
- Developed full CRUD functionality for courses, chapters, and lessons with dedicated dashboards for instructors and learners.
- Integrated Stripe for secure online course purchases and automated enrollment.
- Implemented learning progress tracking, analytics dashboards, ratings, reviews, and Cloudinary-powered certificate generation.
- Designed scalable REST APIs supporting course management, student enrollment, and learning workflows.

Social Media Platform

MERN stack (MongoDB, Express.js, React.js, Node.js)

- Developed a social media platform with secure JWT authentication and refresh-token based session management.
- Implemented real-time messaging, notifications, and interactive social features including posts, comments, likes, and follows.
- Built user profile management with customizable account information and profile images.
- Created search functionality for discovering users and managing social connections.
- Designed REST APIs supporting authentication, content management, and real-time user interactions.

EDUCATION

Faculty of Nursing, Zagazig University — Expected Graduation: 2027
